REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

A review of Applicant's arguments in the Paper filed 10/8/2009 and a review of the instant claims has convinced the examiner that the claims are allowable over the applied prior art of record.

2. Regarding independent claim 1 and the dependent claims, the prior art fails to teach or suggest an easy open end comprising a copolyester resin film having about 5 minutes or shorter half crystallization time and plane orientation coefficient between about 0.04 and 0.01, wherein the copolyester resin has about 94 to about 98% by mole of a terephthaloyl component, at thicknesses from about 10 to about 30 μm on at least one side of a steel sheet, the easy open end being provided with a tear-off groove having a cross sectional shape with curvatures from about 0.1 to about 1 mm.
3. The closest prior art of Okamura et al. (US 5,900,325) teaches a can end comprising a polyester resin film, however, fails to teach an easy open end comprising a copolyester resin film with a plane orientation coefficient between about 0.04 and 0.01, wherein the copolyester resin has about 94 to about 98% by mole of a terephthaloyl component.
4. The secondary references of record do not teach or suggest the combined limitations not taught by Okamura et al. (US 5,900,325).
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
